

Fresnel Desisti Leonardo (2kw)

The Leonardo 2000W is a compact, highly efficient Fresnel lens spotlight and provides a smooth uniform field across the entire spread of Spot to Flood focusing. It uses a single ended Quartz Halogen lamp with a colour temperature of 3200° K and it is available either in Manual or Pole Operated versions. Its innovative design makes it very versatile, granting extended life for lamp, reflector and lens through all the working positions, plus front and rear focusing mechanism and an innovative lens door accessory clips which can be positioned to suit various applications. Lightweight, rugged and reliable either in studio or on location, the Leonardo 2000W has outstanding photometric characteristics.
